Designer flush plates by Lucie Koldová

Purity and clear direction

Lucie Koldová is a significant personality in the Czech design. She creates original furniture, lighting, objects and spaces with a specific atmosphere. Now she has joined Alca to create a series of designer flush plates called Linka and Dot.Dot.

The dominant element of both flush plates is the peripheral ripple. The inspiration was a stream of flowing water. "This element combines simplicity with a story. The emphasis on details, which is reflected in the gentle rounding and minimalism, transforms an ordinary flush plate into a user-friendly and at the same time aesthetic piece," Lucie Koldová describes the idea.

Linka

Strict line softened by the ripple

The flush plate is inspired by the shapes and lines of modern architecture. At first glance, it looks ultimate and uncompromising. But the round shape of the ripple softens the overall expression and the flush plate thus makes the impression of kindness and balance.

Blend in with the wall or let it stand out

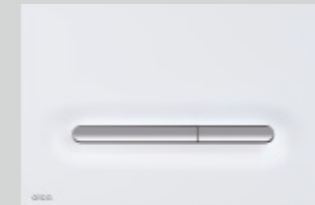

Whatever the requirements, in the wide range of color variants you will find a solution for every space. In addition, the Linka flush plates are so thin that they blend in with the tiling.

Dot.Dot.

The circle as a symbol of perfection

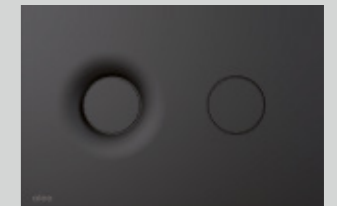

Simplicity and efficiency are the two aspects of the Dot.Dot. flush plate. The traditional symbol of a circle highlighted by an elegant wave represents the story of flowing water. And in addition, it will look absolutely wonderful in the bathroom.

A game of contrasts

Four color variants will suit every bathroom. Minimalist look gives the flush plate in the single-color version an even sculptural character. On the other hand, the contrast between minimalist black and distinctive gold will add courage and elegance to any room.

Concealed WC systems Alca

The pre-wall installation systems Alca are constructed to cover a wide range of applications. This includes not only building into solid walls, dry build up into plasterboard but also an option to install the system into open bathroom spaces.

Each project requires its own solution. Alca WC systems are designed to meet the requirements for both classic masonry construction and modern lightweight materials.
